VOLUNTARY TIMEKEEPING RELEASE NOTES

Version 4.0

July 1994

James E. Van Zandt VA Medical Center
Altoona, Pennsylvania
with the assistance of the
Washington Information Systems Center

New Functionalities in Voluntary Timekeeping Version 4.0

Support for multiple division facilities.

Significant modifications to posting of hours to streamline manual entry.

Electronic update of Austin Master File. Eliminated use of Generic Code Sheet module and/or FALCON for changes to Austin Master File data.

Ability to display/print entire master record for a single volunteer.

Automatic boy/girl - male/female update in Master File sex code.

Local printing of address labels.

Expanded field sizes for names and addresses.

Print telephone listings.

Display/print pending master record updates.

Reduced workload required to input mass award code changes.

Reorganized activities required to transmit data to Austin into more logical menu structure.

Ability to view list of volunteers currently on station, when using Auto Log-in.

Additional pre-programmed reports.

Enhanced security for multiple division facilities.

Support for interaction with volunteers during Auto Log-in in Spanish.

Provide options to scan both the daily entries and time cards for volunteers exceeding 26 entries in a single month for a single combination.

Automatically updates hours, years, and award information on a monthly basis from the Austin AC into the Master File.
